

FOCUS GROUP

We want to hear from you about the services you need and use!

At Aging & Long Term Care of Eastern Washington we are charged with the task of gathering information regarding services in your area for older adults and people with disabilities. It is our commitment to help people “age in place.” Aging in place means that people are able to stay in their homes for as long as possible.

Community input is important, and we would like to hear from you.

Aging & Long Term Care is creating the 2027 – 2030 Area Plan which details what services are a priority and what services are needed in your community. The purpose of the focus group is to gather your ideas about how we can accomplish this goal. This will be an open discussion and your thoughts are valuable to the services provided in your community!

We are looking for older adults, people with disabilities, family members, non-paid caregivers, paid caregivers, diverse community members, Tribal members, veterans, LGBTQ+, neighbors, community members, etc.

Whitman Hospital & Medical Clinics—Annex
