

EPIC SPONSORSHIP POST EVALUATION REPORT

I wanted to share with you how our event went. Jake from Vive18 spoke at 3 schools, Pomeroy High School, Asotin-Anatone High School, and Lincoln Middle School, and I received feedback from Asotin directly. They had their middle school and high school both in attendance which is great since it reached more kids! They said "It was great. The kids loved it and the teachers shared that they loved that his messaging wasn't just for kids who struggle with substance abuse, but also for kids that want to help their community." He also shared that he wants to work with our coalition again in the future which is very exciting.

The only non-positive feedback was that their gym's acoustics were less than ideal, but the kids still got the message. I have not heard back from Lincoln Middle School yet, but I expect similar feedback. I've attached photos of both events. Pomeroy's coalition coordinator shared with me that the kids loved the presentation up there and were very engaged. We want to thank Greater Health Now for considering and awarding this sponsorship. The award allowed us to reach hundreds of kids with this messaging.

Thank you so much!
